SUMMARY

Android Developer | Mobile & Backend | Experienced in building secure, scalable APIs and Android apps using Jetpack Compose, Views, and ComposeMultiplatform for cross-platform delivery. Skilled in Spring Boot, Ktor, JAX-RS, SQLServer, PostgreSQL.

- **Languages:** Java, Kotlin, C/C++, T-SQL
- **Frameworks:** Spring Boot, Ktor (Server/Client), Hibernate, Exposed, Jetpack Compose/Android Views, Dagger-Hilt, Koin, Retrofit, Kotlin Flows, LiveData, Kotlin Coroutines
- **Databases:** Microsoft SQL Server, MySQL, PostgreSQL, Sqlite
- **Architectures:** MVVM, MVC, Clean Architecture
- **Tools:** Git, Gradle, R8, Android Studio, Eclipse, IntelliJ Idea, Docker, Excel, Postman
- **Methodologies:** Agile
- **Other:** Github Actions, Performance Optimizations in Android/ART

WORK EXPERIENCE

ANDROID DEVELOPER | UDYATA INFORMATION SYSTEMS PVT. LTD, THRISSUR

2 Years

- Developed Android applications using XML Views and Jetpack Compose.
- Worked with Dagger-Hilt, Retrofit, Kotlin Coroutines, Ktor-Client, Koin, LiveData, Kotlin Flows, Room, and Gradle.
- Implemented MVVM and Clean Architecture.
- Applied code obfuscation using R8 and ProGuard.
- Integration of 3rd party native libraries like, physical barcode/qrcode/rfidtag scanner
- Optimize performance for a specific set of devices, while also supporting all

KOTLIN MULTIPLATFORM DEVELOPER | UDYATA INFORMATION SYSTEMS PVT. LTD, THRISSUR

1 Year

- Developed cross-platform applications using Kotlin Multiplatform (KMP), sharing business logic and UI across Android, IOS and JVM
- Designed scalable architectures using clean architecture principles, ensuring maintainable and modular shared codebases.
- Integrated Ktor client/server for seamless API communication across platforms with reusable networking layers.
- Implemented efficient data handling using Kotlin coroutines, Flow, and serialization for consistent state management.
- Built and optimized Android UIs using Jetpack Compose while leveraging shared ViewModels and domain logic.
- Collaborated on multi-module Gradle setups, managing dependencies and ensuring smooth cross-platform builds and deployments.

PROJECTS

INVENTRA

- A modern inventory manager. Streamlined business logistics operations efficiently
- Tracked actual stock-on-hand values.
- Utilized robust dependency injection architecture.
- Built multi-level approval workflow action.
- Integrated optical character recognition scanning
- **Technologies:** Jetpack Compose, Google MLKit

KEYTAB

- A customizable table booking system tailored for restaurants, halls, and eateries.
- Crossplatform Compatibility, Advanced/Custom layouts,
- **Technologies:** Kotlin Multiplatform, Koin, Ktor-Client

REWARDS PRO

- CMS with Loyalty rewards dashboard for businesses to monitor reward points and user behavior
- Barcode scanning

- Graceful crash handling
- Custom theme
- Developer flags
- **Technologies:** Jetpack Compose, Dagger-Hilt, Retrofit, MMKV, Coil

STOCK SENSE

- A stock management system for hotels, focused on inventory accuracy and operational efficiency.
- RealTime dashborad, Scheduled job
- **Technologies:** Spring Boot, MySQL, Jasper Reports

AYURWARE ERP (LEGACY)

- An ERP system for manufacturing ayurvedic medicines, enhancing process efficiencies across purchasing, sales, production, and packing.
- Real-time data flow
- **Technologies:** Microsoft SQL Server, JavaFX, JSF, PrimeFaces, Jasper Reports, JAX-RS, GlassFish

AYURWARE V2

- Rewrite of legacy Ayurware ERP that focuses on ayurvedic medicine manufacturing comapanies in Java Spring Boot as Backend and Kotlin Multiplatform for frontend
- MDI based user interface for multitasking
- Keyboard first navigation and user architcture
- **Technologies:** Jetpack Compose Multiplatform, Spring Boot, Jasper Reports, Git, Github Actions, Ktor-client, Koin

EDUCATION

Maharaja's Technological Institute, Chembukkav

Diploma in Computer Engineering

ACHIEVEMENTS AND CERTIFICATES

- Delivered production-ready features ahead of deadlines, receiving positive feedback from team leads
- Led successful client project deliveries under tight festival/election timelines with zero downtime
- Applied advanced coding techniques, including annotation-driven development, to create robust and extensible software solutions.
- Executed a comprehensive migration strategy for an Android application, transitioning from imperative Android Views to a declarative Jetpack Compose architecture using Kotlin.
